A message from the Executive Director:

This past school year has been filled with gratitude as we returned to full services in person once again, and the world reopened with a hopeful disposition. Despite the hardships we faced due to the pandemic, Wild Plum has focused on brighter horizons and has shown great determination to meet our community where they are while creating opportunities of equity in our outreach and impact.

In order to continue on the path of equity through education and providing high quality services, we recognize that we cannot do it alone. We are grateful for the support of our donors and the diverse grant funding sources that support our efforts in improving access to affordable education. We received an increase in one time financial supports from the American Rescue Plan Act (ARPA) as part of the COVID relief funding, as well as Stabilization grants from the State of Colorado Childcare. Even in the face of the negative economic impacts, we appreciate our partners and donors that included Wild Plum Center in their various response efforts.

We were encouraged by the results of a Community Needs Assessment, which identified areas of growth for our programming that could better meet the needs and wants of our families, and allowed us to explore our options for increasing the community's access to childcare. For the second year running, our 6-week summer program has supported preschool age children in their transition to Kindergarten using a STEAM focused curriculum. With two successful years under our belt, this has become an annual opportunity for our families to count on. Other identified areas showed a desire for longer hours of child care and a Friday care option for our preschool students. These are all feasible changes for future implementation.

The outcome of each review and assessment we take part in allows us to identify areas we can focus our efforts to create a more equitable and effective plan for our programming. In addition to the internal assessment of our program and those we serve, Wild Plum Center completed a federal review in which no areas of concern were identified. We also decentralized enrollment, which has been key in responding to local needs. Diversity does not start or end in the classroom. Having a variety of approaches and implementation strategies benefits our community as well as our families, students, and staff.

We were pleased to welcome many new faces on staff this year, each of whom found Wild Plum Center at a time of uncertainty and have seen the importance of what we do. In addition to the financial hardships and upheaval the pandemic brought on, there was a large disruption to the labor force nationwide. We were able to quickly bounce back into action post-closures and find our footing to welcome in new children, families and staff members to our programs. This also gave us an opportunity to focus on our staff training, coaching, and support efforts. While some of us returned to work in person this year, some entered into a new environment and we all need to recognize that there is room for grace and growth in this new and ever-changing world of early childhood education.

Services

Quality early childhood education is one of the most effective ways to influence the path of a child and their family. We partner with families so that parents are empowered to participate in their child's education and wellness. In addition to classroom programs, our Family Specialists conduct in-home visits where they can get to know a child's individual needs and address strengths and weaknesses within the family. This kind of attention to detail and a caring approach is what drives our success.

Infant/Toddler Programs- 0-3 years

Developmental services are provided to 0-3 year old children from low-income families, including prenatal and post-partum support for pregnant women and children with disabilities. Parents/guardians may select from either a home-based or center-based service model, each provided at 100% scholarship. All services are offered in both English and Spanish.

- Home-based services involve Family Mentors working with parents one-on-one in a home setting for 1.5 hours each week. This option is supplemented by group-delivered parent education and parent/child socialization activities with Family Mentors.
- Center-based services provide a curriculum-based setting for children while parents work or go to school. Service elements are intended to address any and all aspects of need within a child's life, allowing for significant developmental experiences.

Preschool Programs- 3-5 years

A comprehensive preschool program is available to low-income 3-5 year olds including children with disabilities. Preschool service elements mirror those of the Infant/Toddler Program, addressing all aspects of need and allowing for meaningful and impactful educational experiences.

Curriculum

Research-based Creative Curriculum, Frog Street, and Growing Great Kids are used in all 15 Wild Plum classrooms and the home visiting program. Each of these curricula focus on all areas of children's growth:

- Physical
- Cognitive
- Social/emotional
- Language and Literacy
- Approaches to Learning

By utilizing each of the three curricula, every teacher or Family Mentor is able to incorporate and address the specific interests, characteristics, and needs of the children and families in their class. Teachers and Family Mentors integrate a study that immerses students in that topic through materials, books, and activities- all sparked by student interests.

Family Engagement

Wild Plum Center regards parents as the first, the best, and most important teachers of their children. Wild Plum Center offers numerous opportunities to foster the health and well-being of program children and families, including:

- Mental health services
- Family support and case management
- Parent education and socialization

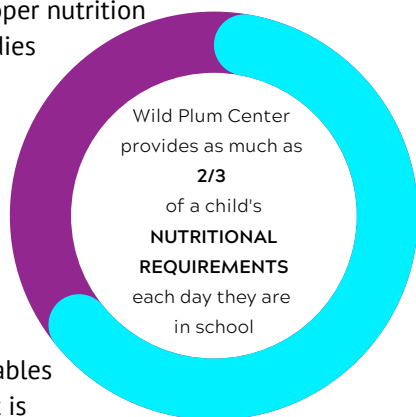

Health and Nutrition

Wild Plum Center knows that children need proper nutrition throughout the day so that their brains and bodies can function properly and are able to engage.

Using the USDA MyPlate in addition to working with the Child and Adult Care Food Program, cooks prepare meals each day for all of the classrooms.

Breakfast includes milk, fruit and whole grains. Lunch consists of milk, protein, fruit and vegetables and all snacks include fruit and whole grains. It is important that our students receive the nourishment they need in order to grow, learn and be successful which is why we are glad to provide 2/3 of their nutritional needs every day that they are in the classroom at no-cost to the family.

Wild Plum Center works with parents and caregivers to access healthcare screenings and services for their children. Our health services include:

- Hearing and vision screenings
- Well-child support, including care and vaccines
- Prenatal, postpartum, and breastfeeding support and education
- Home safety education
- Nutrition information for the entire family, such as helping families access supplemental food items
- Prenatal and postpartum mental health screenings

We also provide referrals to health providers and other community resources as appropriate and help families understand and navigate complicated medical situations to ensure they get proper treatment.

Additionally, all Wild Plum parents can participate in First Aid and CPR classes at no cost to them.

Preschool Outcomes

Wild Plum Center uses the Teaching Strategies Gold assessment system for all children. In the fall, winter, and spring the teachers use checkpoints to compare each child's skills and behaviors to research-based indicators of learning and development. These comparisons indicate, for each domain, whether a child's skills and behaviors are below, at, or above expectations for their age.

The graph shows the percentage of children meeting or exceeding expectation in areas of targeted skills when they started at Wild Plum Center in the Fall of 2021 and where they were at the final Spring checkpoint in 2022.

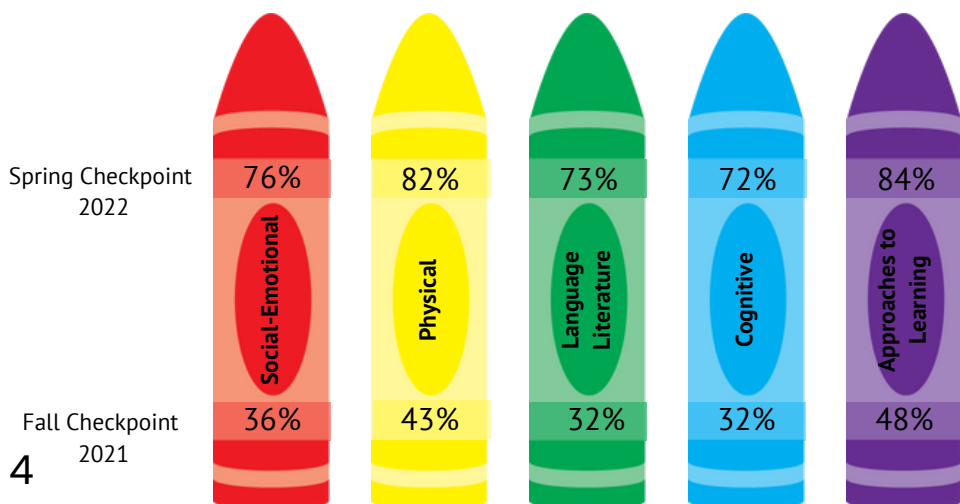

Children in all categories showed improvement from the Fall to Spring checkpoints, and there was significant growth in children meeting expectations overall.

Numbers of children meeting and exceeding expectations on average were greater than 72% in all domains: social/emotional, physical, language and literacy, cognitive and approaches to learning.

The significant growth, nearly 40% in all areas, proves the effectiveness of Wild Plum Center's positive impact on children's development and kindergarten readiness.

Percentage of Students Meeting and Exceeding Expectations at Fall 2021 and Spring 2022 Checkpoint

*English/Spanish Speaking
Ages 3-5 years*

Infant/Toddler Outcomes

Young children engage in learning in individually unique ways, which is why Wild Plum individualizes care and nurturing, intentionally teaching to a child's strengths and preferences. Through this approach, Infant/Toddler teachers and home visitors expose children to an array of learning opportunities designed to improve growth in each of the five developmental domains.

Wild Plum uses data to inform instruction allowing us to understand how our efforts are working and the developmental areas in which Wild Plum children may need more support. Data is gathered in the areas of social-emotional, physical, language, literacy, and cognitive with a subset of data related to approaches to learning.

**Percentage of Students Meeting and Exceeding
Expectations at Fall 2021 and Spring 2022 Checkpoints**
*English/Spanish Speaking
Ages 0-3 years*

The chart above show the percentage of Wild Plum children ages 0-3 meeting and exceeding expectations of the targeted skills when they started at Wild Plum Center in the Fall of 2021 and where they were at the final Spring checkpoint in 2022. At the last available checkpoint, the Wild Plum Early Head Start children are shown to be on track developmentally and showed up to 35% improvement across all areas.

Family Outcomes

Wild Plum believes that strong family engagement leads to strong child outcomes.

In addition to monitoring children's progress, Wild Plum Center assesses self-sufficiency, connections to peers and community, and parent/child relationships. The 21 areas of measure include:

- Reading Daily
- Positive Discipline
- Child Care
- Having Routines
- Employment
- Housing
- Life Skills
- Volunteering
- Language Rich Experiences
- Health Care Access
- Child Safety
- Food
- Transportation
- Money Management
- Criminal Justice System
- Substance Use
- Support System
- Physical Health
- Relationship Safety
- Mental Health
- Adult Education

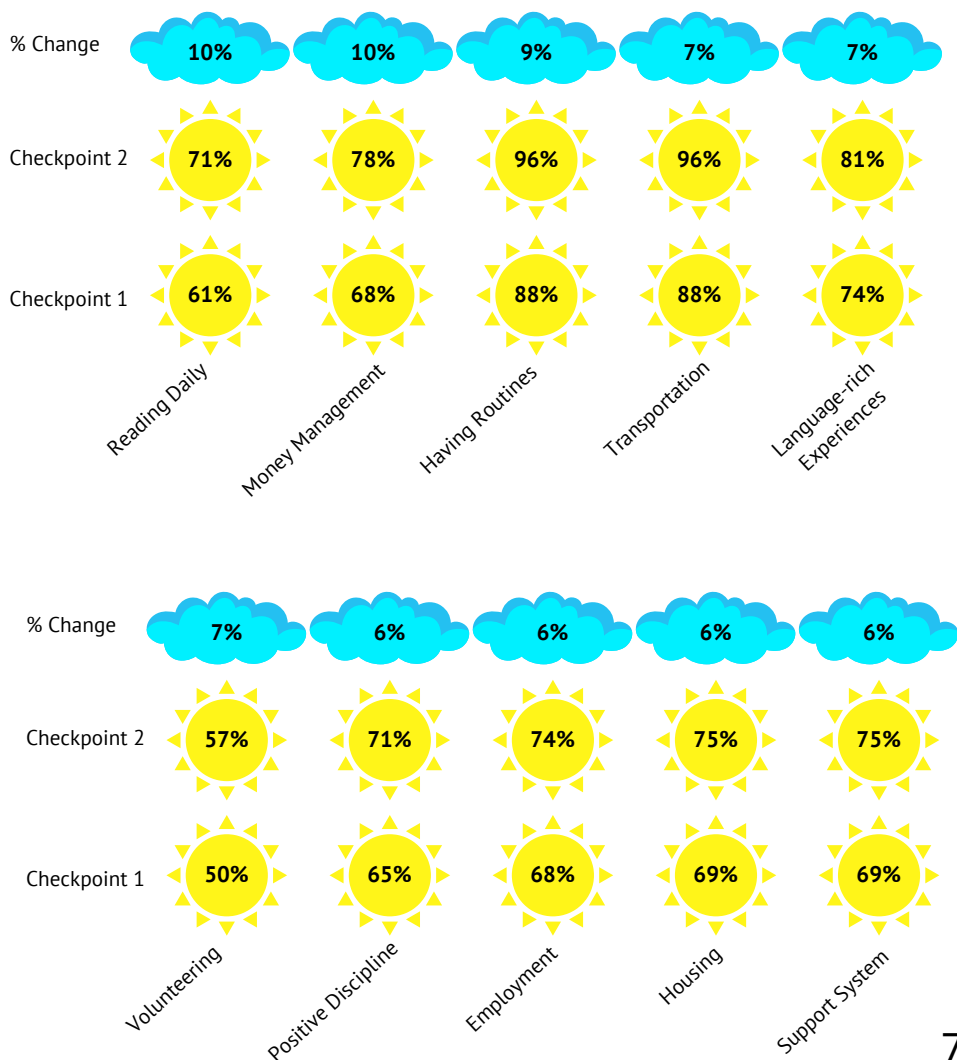

Family Outcomes

Every Wild Plum Center family participates in a Self-Sufficiency Analysis, as well as a review of progress made toward goals as outlined in an individualized Family Partnership Agreement.

The graph below displays outcomes from the analysis, showing increases in several areas of self-sufficiency for program families.

Family Outcomes 2021-2022 School Year

Transitions

All transitions are opportunities for children's growth, as they lay the foundation on which to develop the skills that are necessary for weathering change throughout life. Transitions into Early Head Start, from Early Head Start to Head Start, and Head Start to kindergarten are crucial times for decision-making about children's services. The transition process ensures service continuity, reduces family disruptions, prepares children for their program placements, and meets legal requirements (IDEA and ADA).

Our Transition Plan is designed to help children who are transitioning from one setting to the next. In order to make these transitions as seamless as possible, Wild Plum Center staff maintains close and consistent contact with the child and family through every step of the process. The transition process is individualized for each child and family.

Transition plan for Infant/Toddler:

For children transitioning from the home-based model into center-based infant/toddler care, the Family Mentor works closely with the parents and the center-based staff to share strengths and supports for the child and family. The family is an integral part of the process and is involved regularly with both home and center-based staff for a two month transition period.

For children transitioning from the home-based and center-based programs into preschool, there are several conversations that take place between Wild Plum Center staff and parents that begin six months in advance of the actual transition.

First, the family is educated on the community preschool options available to them, including Wild Plum. If the family selects and qualifies for preschool, staff begins to prepare the child for school by utilizing a "transition kit" that includes materials and supplies to help familiarize them to the preschool classroom. Infant/toddler staff, together with parents, meet in the classroom for an orientation and exchange of necessary paperwork.

Transitions

Transition plan for 4 and 5 year olds going to kindergarten:

Throughout the school year, on-going discussions about kindergarten occur with children and their parents. Wild Plum Center staff talk with student's families about the registration process, support them through enrollment, fill out scholarship requests, help with translations, and encourage parents to continue to advocate for their child's education. Transition meetings with the school district are scheduled as needed and families are encouraged to visit the new school. Transition meetings for children with Individual Education Programs (IEP) that are moving on to Kindergarten take place at the end of the school year. Special Education service providers, WPC staff, parents and staff from the transitioning school meet to discuss services for the next year so parents are aware of the continuing plan.

In 2022, Wild Plum Center offered their summer program for the second year to further assist children transitioning to Kindergarten. This program is focused on STEAM learning-science, technology, engineering, art and math.

Demographics

Infant/Toddler

Enrollment year: September 2021 - August 2022

TOTAL CUMULATIVE ENROLLMENT:
106 CHILDREN FROM 85 FAMILIES

Parent involvement

Wild Plum Center makes every effort to support parents through their own journeys in parenthood and paths to self-sufficiency and lifelong learning. We create many opportunities for all parents and caregivers of children who are enrolled in our programs to become more engaged with their children and involved with their education.

These include:

- Participation in Parent Policy Council. This is one of Wild Plum Center's two governing bodies.
- Participation on the Health Advisory Committee. This is a group of medical and healthcare professionals and parents who work to ensure that all Wild Plum Center children receive the health care they need.
- Parent/Child activities. These events include parent educational activities and workshops, gatherings in the local parks, dance performances, visits to museums and children's fun centers, recreation centers, and other community events.
- Parenting Classes teach skills and strategies to raise children who are happy, well-behaved, have good relationships, and are successful in school and in life.
- Infant/Toddler and Adult CPR/First Aid Classes.
- Kindergarten transition support.
- In-home learning opportunities.
- Summer school kit provisions.
- Conscious Discipline Parent Nights.

Community Partnerships

Wild Plum Center has a long history of effective collaborative relationships with a variety of local non-profits, Boulder County/Colorado organizations, and foundations.

Olga Bermudez, M.A., L.P.C.

Amy Homann, Parent Representative

Show Your Support

INVEST IN EARLY CHILDHOOD EDUCATION

Please consider contributing to the Wild Plum Center with a monetary donation. Without these gifts of financial support we would not be able to provide essential services to Longmont's low income families and their children. If you want to contribute to equity through education, visit www.wildplumcenter.org/donate

BECOME A COMMUNITY ADVOCATE

There are countless ways to support the hundreds of families we are honored to serve. Whether you are looking for a home for your gently used toys, clothes and books or you are looking for a group volunteer project, we would love to work together!

To find out more about becoming a donor, volunteer or community advocate contact us today!

At Wild Plum Center, we partner with families so children can thrive. We are supporting low-income families in Longmont through individualized early childhood education by addressing any and all aspects of need within a family. We work to ensure children enter school prepared to learn and families are provided with services that equip them to be successful.

Our early childhood education programs are provided at no cost to qualifying families.
